DETAILED ACTION

Allowable Subject Matter

Claims 1-14 and 15-26 allowed.

The following is an examiner's statement of reasons for allowance: After consideration of applicant's arguments, the examiner concurs that Ofer provides a disk controller that converts data between a host format and a format consistent with a type of drive that is connected to the controller. Additionally, while the combination of Shultz and Ofer produces a system similar to applicant's claimed invention, and the combination of Shultz and Ofer would likely require movement of data from a drive of a first format to a drive of a second format (likely via the intermediary host format), the seam of combination of Ofer and Shultz is the same as the applicant's inventive concept. While Ofer provides a motivation for use of his disclosed invention, neither Ofer nor Shultz directly indicate anticipation of their invention's combination with the other, thus neither specifically discloses the method of converting data from a first disk format to a second disk format. Moreover, the combination of Ofer and Shultz does not produce a system which *inherently* performs disk format translation in the manner claimed by applicant, for these reasons applicant's claims 1-14 and 15-26 are found allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
